Profile

Technically strong landscape architect specialized in planting design, with a solid professional foundation in biodiversity and plant ecology. Strong graphic and technical skills, with extensive experience in developing, visualizing, and realizing complex landscape projects. I define success collectively and prioritize team performance over individual recognition.

Professional Experience

2023–Present | HAVIA, GreenDesign Group – Landscape Architect & Planting Designer
Biodiversity analyses, planting strategies, project design, technical drawings, construction supervision, BioScore analysis.

2017–2023 | Biotopos ApS – Founder & Landscape Architect
Biodiversity consultancy, planting design, project management, clients such as PKA, ATP and the Danish Society for Nature Conservation, among others.

2020 | Archival Studies, Copenhagen – Landscape Architect
Advisory role, planting plans, urban projects, lectures on biodiversity.

Education

MSc in Landscape Architecture (Landscape Design), University of Copenhagen, 2019
Thesis: Implementing Biodiversity in Landscape Architecture

BSc in Landscape Architecture, University of Copenhagen, 2017

Key Skills

Planting design, biodiversity strategy, nature-based solutions, ecological analysis, project management.

Software

AutoCAD, Rhino, Adobe Suite, GIS, SketchUp, V-Ray, Lumion.
